SHAPING YOUR IDEAS AND PROJECTS

ABOUT US

We are a Bangalore based company engaged in exporting and providing high quality natural stones. With a range of novel products to suit outdoor landscaping, elevation and cladding, we offer our customers with a diversified range of products that are tested thoroughly and processed through many different stages so that the qualities of the products are maintained.

We believe that every house is unique and should be built with love and creativity to make it a home.

ABOUT THE PRODUCT

Natural Stone products are more durable than many artificial products, often lasting for decades with very little maintenance. With Natural Stone there are no worries about exposure to harmful chemicals in the home or released into the environment during production or disposal.

The amazing variety of mineral-rich colors and natural patterns gives it ornamental value. Granite products are ideal for flooring, countertops, vanities and decorative exterior applications.

The stone selection starts at the quarry where we select the blocks and transport them to our selected factories which have very high quality machines for processing. The product is inspected at every stage by our experienced team of inspectors who are committed to delivering excellent products to ensure maximum customer satisfaction.

Our four stage motto is: Quality Stones, Quality Packing, Timely Deliveries and Competitive Prices. From sourcing to the final finish, we ensure strict quality control in every stage of processing so that the stone that lands at our customer's place meets their expectations.

NERO BLACK

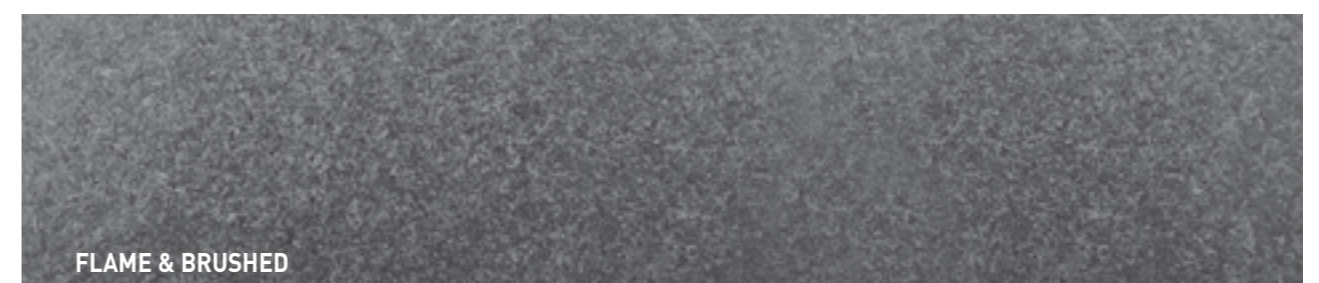

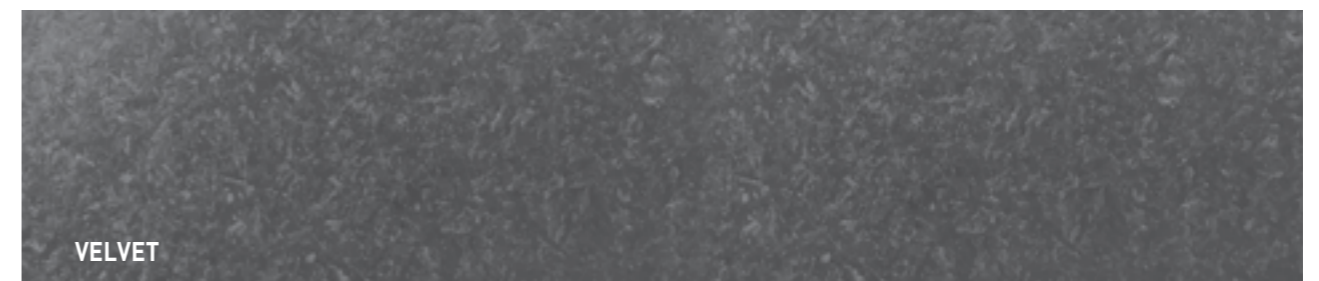

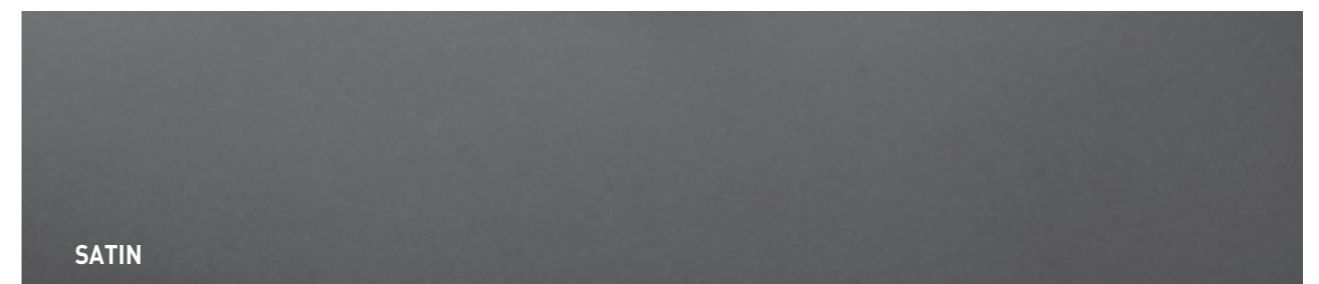

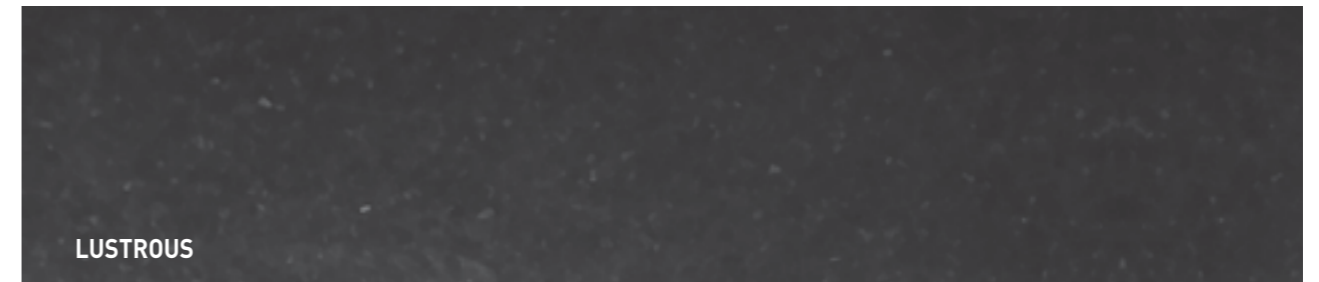

Density **3193 kg/m³**
Flexural Strength **254 kg/cm²**

Compressive Strength **1592 kg/cm²**
Water Absorption **0.10%**

THICKNESS RANGE POSSIBLE 10-150 MM

CHOOSE FROM OUR RANGE OF NERO BLACK COLLECTION

Available in
LUSTROUS | SATIN | VELVET | FLAMED | FLAME & BRUSHED
Finishes

RAIN DROPS

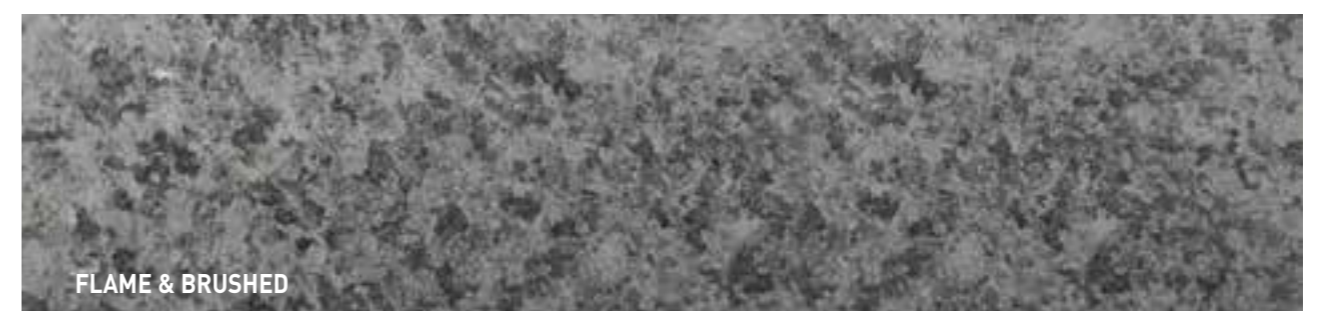

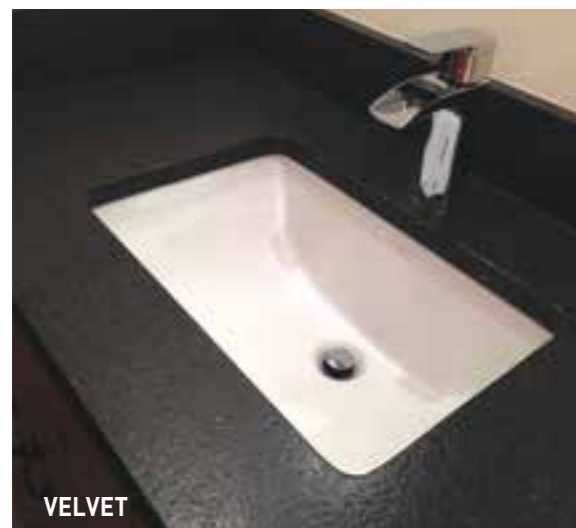

Density **2800 kg/m³**
Flexural Strength **274 kg/cm²**
